DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be replete with idiomatic errors.

Claim 1 is so unclear that the examiner cannot determine what the applicant is claiming and therefore cannot do a Prior Art Search at this time. For example, in claim 1, line 12, it states after the substitution is made for (a)(2); "means for shaping and optionally polarizing excitation light of means for shaping and filtering the light from the excitation light source of as an excitation light source ,". This is incomprehensible.

Additionally, there are potentially antecedent basis issues because the examiner could interpret (a)(2) as "a means for shaping..." or "said means for shaping..." because it is not clear which of the two the applicant intends to claim. These problems exist in all of the claims. As a further example of indefiniteness, dependent claim 10, line 5, states "said optical fiber channel of (b)". However, claim 9, line 8, gives (b) as "an optical fiber channel", while claim 1, line 7, gives (b) as "multiple optical fiber channels" so it is

unclear what is the meaning of (b) in claim 10 since claim 10 depends from claim 9 which further depends from claim 1. Claims 2-48 depend from claim 1 and thus contain the same deficiencies.
